**IND Title:** Human Coronavirus mRNA Vaccine (SARS-CoV-2 Spike Protein; BNT162b2) in Lipid Nanoparticles (ALC-0315, ALC-0159, DSPC and Cholesterol) (Pfizer-BioNTech COVID-19 Vaccine)

**SUBJECT:** (b) (6) Information Request (missing information)

1. During the recent inspection of site number 1125 for the study C4591001, FDA investigators noted missing information such as toxicity grading, respiratory treatment, or hospitalization for COVID-19 illness visit in subject source documents which are supposed to be collected from subject eDiaries through the TrialMax app.
  - a. When the source documents are missing information such as toxicity grading, respiratory treatment, or hospitalization for a specific COVID -19 illness visit, describe your plans and procedures implemented: (i) to have such information entered by the clinical sites in the CRFs; (ii) for data monitoring; (iii) to initiate CAPAs. If data clarification forms (DCFs) were generated to request entry of such information in CRFs, please describe the rationale for such requests in the absence of missing information in source documents. Please include how many such occurrences you encountered in your study C4591001 at the US sites, if applicable.
  - b. The CRF Completion Requirements document collected from the site instructs the sites that adverse events can be reported on the CRF as deemed necessary by the clinical investigator even if such data are missing in subject eDiaries that are supposed to be collected through TrialMax app. Please clarify how you reconciled the missing data to be collected through TrialMax app for your study data submission in EUA 27034 with documentation.

If you have any questions, please contact me by email: (b) (6) or  
at (b) (6).
