

MARCH MONTHLY MEETING SUMMARY

Application number: BLA STN 125742/45

Product name: COVID-19 Vaccine, mRNA (COMIRNATY)

Proposed Indication: Active immunization to prevent coronavirus disease 19 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) in individuals 12 years of age and older

Applicant: BioNTech Manufacturing GmbH

Meeting date & time: March 2, 2022; 1:00 - 2:00 PM EST

(b) (6) (b) (6)

Meeting Recorders: (b) (6) and (b) (6)

1. Background

COMIRNATY (COVID-19 Vaccine, mRNA) was originally approved on August 23, 2021, for active immunization to prevent COVID-19 caused by SARS-CoV-2 in individuals 16 years of age and older. The current application, received on December 16, 2021, is an efficacy supplement from BioNTech Manufacturing GmbH (in partnership with Pfizer, Inc.) for COMIRNATY to extend the indication to adolescents 12 through 15 years of age.

The purpose of this meeting was to discuss the progress of the review, identify and present any issues, and plan the remainder of the review, including dates for further deliverables and interactions.

Review Timetable (PDUFA Milestones are in blue)

Review Milestone

Submitted:

Target Due Date

16-DEC-2021

Received:

16-DEC-2021

Committee Assignment:

30-DEC-2021

First Committee Meeting:

06-JAN-2022

Filing reviews complete:

25-JAN-2022

Confirm (b) (6) (GCP) Inspection Sites

30-JAN-2022

Filing Meeting:

31-JAN-2022

Filing Action:

14-FEB-2022

Deficiencies Identified:

28-FEB-2022

Primary Draft Reviews & Reviewer Reports Due
(4 days prior to Mid-Cycle meeting):

31-MAR-2022

Mid-Cycle Meeting (Internal):

06-APR-2022

Notify Safety Working Group (SWG)

18-APR-2022

PeRC Briefing materials due:

19-APR-2022

PeRC Meeting:

03-MAY-2022

Labeling Comments to Applicant:

18-MAY-2022

Final draft primary reviews with supervisory

Concurrence (upload not required):

18-MAY-2022

Notify (b) (6) of pending approval:

18-MAY-2022

Notify Applicant of PMC/PMR:

18-MAY-2022

Final reviews & addenda signed & uploaded:

12-JUN-2022

PDUFA ADD:**17-JUN-2022**

Table 2: Scheduled Meetings

PDUFA Meetings:
First Committee Meeting: January 6, 2022 (by email)
Filing Meeting: January 31, 2022, 12:00PM – 1:00PM
Internal Mid-Cycle: April 6, 2022, 1:00PM-2:30PM
Monthly Committee Meetings:
March 2, 2022; 1:00 – 2:00 pm
May 17, 2022; 3:00 – 4:00 pm
Labeling Meetings:

April 8, 2022 (w/o MGMT); 12:30 – 2:00 pm
April 11, 2022 (w/o MGMT); 1:00 – 3:00 pm
April 20, 2022; 2:00 – 4:00 pm
April 21, 2022; 3:00 – 5:00pm
May 3, 2022; 3:00 – 5:00pm
May 11, 2022; 2:00 – 4:00pm

2. Discussion Topics

2.1 Opening remarks from the Chair and RPMs

The Chair informed that the PeRC meeting is scheduled for May 3, 2022, and therefore, the PeRC materials due on April 19, 2022. He asked the reviewers to inform the regulatory team if any reviewer is planning to present the review summary at the Mid-Cycle meeting.

2.2 Review of milestones and internal/projected target dates

2.3 Status update (including any major concerns that have been identified so far) from each member of the review committee

2.3.1 Clinical ((b) (6)):

The clinical review is ongoing, and two IRs are currently being drafted with the statistical reviewer. The first is regarding the immunogenicity endpoints and lower limit of quantification that was discussed briefly during the review of the EUA amendment for use of the Pfizer-BioNTech COVID-19 Vaccine in children 6 months to <5 years of age. The second IR is to address the slight differences in the solicited adverse reactions submitted for the 6-month data.

2.3.2 Statistics ((b) (6)):

The statistical review is still ongoing, and the two IRs mentioned by the clinical review are currently being drafted.

2.3.3 Benefit-Risk assessment ((b) (6)):

It hasn't been decided yet if a benefit-risk assessment will be required for this supplement. Additionally, data may not be available for this age group in BEST since it is for adolescents 12 through 15 years of age. The team will check to see if BEST data available for this age group or 17 years of age and younger and will let the rest of the review team know as soon as possible or at the Mid-Cycle meeting.

2.3.4 Real World Evidence ((b) (6)):

The reviewer noted that she will review the RWE publications that are referenced in parts of this supplement. During the review of the original

Comirnaty BLA for individuals 16 years and older, we asked the Applicant to include 12-15 years old individuals in the post-marketing safety and effectiveness studies, so this age-group has already been covered in the existing PMRs and PMCs.

2.3.5 Epidemiology/Pharmacovigilance (b) (6):

The PVP plan is currently under review and there have been no major issues identified at this time.

2.3.6 (b) (6) (b) (6) and (b) (6):

Three clinical inspections were issued on February 17, 2022. The first will start on March 7, 2022. The due date for the inspections is April 6, 2022, and no additional inspections are anticipated for this submission.

2.3.7 CMC (b) (6):

The review is ongoing with no issues identified at this time.

2.3.8 (b) (6) (b) (6):

The review is ongoing, and a draft review should be completed by March 31, 2022.

2.3.9 (b) (6) (b) (6):

The (b) (6) reviewer was not able to attend the meeting, but no issues have been identified at this time.

3. Information Requests:

1. 01/19/2022: Three questions regarding datasets.
2. 01/25/2022: Request for an updated FDA form 356h and an Environmental Assessment or claim of Categorical Exclusion.
3. 02/23/2022: Two questions on cumulative analysis of post-authorization adverse event reports.

4. Amendments:

1. STN 125742/45.1 (01/28/2022) – Response to January 25, 2022 request regarding submitting (1) updated Form 356h to include information regarding all establishments and manufacturing facilities, and (2) an Environmental Assessment or Claim of Categorical Exclusion.
2. STN 125742/45.2 (02/02/2022) – Response to January 19, 2022 request regarding datasets.
3. STN 125742/45.3 (3/1/2022) – Response to February 23, 2022 request regarding cumulative analysis of post-authorization adverse event reports.

5. Action Items

- The clinical and stats teams will finalize their two IRs to be communicated to the Applicant.
- The benefit-risk team will check to see if there are any updated data for this age group.
