Re: Request for Emergency Use Authorization (EUA) 27034

Pfizer-BioNTech COVID-19 Vaccine

**General Correspondence – Updated Emergency Use Authorization Educational
Materials**

Dear Dr. Gruber,

Reference is made for the Request for Emergency Use Authorization (EUA) for Pfizer-BioNTech COVID-19 Vaccine for the prevention of COVID-19 in adults ≥ 16 years of age submitted 20 November 2020.

As the Agency progresses its review of Pfizer and BioNTech's application for Emergency Use Authorization (EUA) of the Pfizer-BioNTech COVID-19 Vaccine, Pfizer/BioNTech are providing an update on the educational materials.

Reference is also made to Pfizer's letter dated September 29, 2020 (SN0096) submitted to IND 019736, Pfizer noted that *"To ensure timely and efficient administration of the vaccine, it will be critical to educate healthcare providers on the safe handling, storage and administration of the vaccine by the time they receive their first vaccine shipment. We believe this is also an important goal of the U.S. Government team within Operation Warp Speed that is working with Pfizer to operationalize the agreement. Consequently, in parallel to the drafting of the proposed EUA Fact Sheets for HCPs and patients which will be included in our EUA submission, we are developing educational materials describing the appropriate handling, storage, and administration of the vaccine. Should the Pfizer-BioNTech vaccine candidate receive an EUA, Pfizer intends to share these materials immediately."*

090177e195ba84b5\Final\Final On: 08-Dec-2020 16:40 (GMT)

With input from a CDC representative on the OWS team, Pfizer has developed educational materials intended for vaccination centers regarding the appropriate shipping, handling and administration of the Pfizer/BioNTech vaccine. OWS has asked Pfizer to make these materials available to vaccination centers immediately, in advance of an EUA decision, so that centers have adequate time to review the materials and prepare for administration before receiving their first vaccine shipment. Similarly, hospital systems supporting the first wave of OWS vaccine distribution have requested to receive these materials as soon as possible, and prior to an EUA, to have adequate time to review the materials and be prepared for vaccine administration as soon as possible after an EUA issues.

Pfizer is making these materials available via a website, which will be made available by invitation only to appropriate state and hospital officials who will be a part of the first wave of OWS vaccine distribution. Pfizer also plans to provide the important information in these materials through optional Webex training sessions with these initial sites to help foster preparedness.

Pfizer is not reaching out with any specific question; rather, we are providing this as an informational update to be as transparent and collaborative as possible. The Agency may request access to this site by emailing (b) (6)

This submission has been scanned for viruses using McAfee VirusScan Enterprise Version 8.8 and is virus free. The submission is being sent via the Gateway.

Should you have any questions regarding this submission, or require additional information, please contact me via phone at 215-280-5503; via facsimile at 845-474-3500; or via e-mail at elisa.harkinstull@pfizer.com.

Sincerely,

Elisa Harkins
